Midjourney Monsters
three audio vignettes inspired by AI images

1. <u>death metal piano player</u> [00:42]
   Elements include Switched-On Bach, Charles Ives, Buchla synth, et al. Some sounds produced using Wwise for granular synthesis and variation generation. The final electronic moan conveys the horror and despair of the anguished musician's ghost trapped inside this technological monstrosity ...

2. <u>field recording</u> [00:54]
   Live capture of the territorial vocalizations of the Giant Inflatable 3-Eyed Ball Monster.

3. <u>9 monsters</u> [01:08]
   Nine tracks of creature sounds, spread across the stereo field. Each track's audio is derived from a different animal. No wookies were harmed during the making of this video.
